1H22 Financial Results

1H22 Financial Results – Revenue Breakdown

A more balanced revenue mix with a lower weight for market-related activities

Key comments

Very solid performance of the IB
Division, with a strong contribution
from M&A despite the weakness of
ECM activities

S&T outperforming its reference market in spite of the weak environment. Particularly positive contribution from cross selling of bonds and derivatives to Institutional Investors

Double-digit growth of DD&A (+14%), confirming the attractiveness of the business

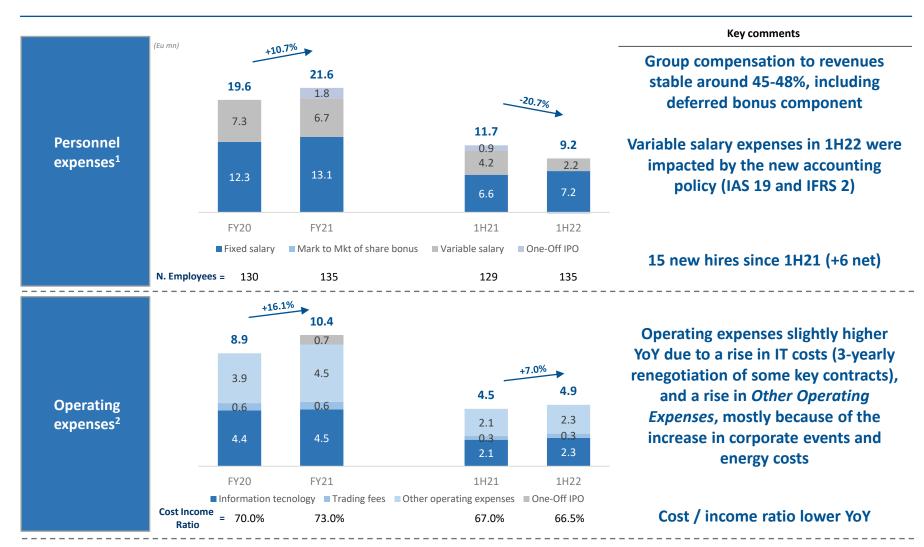

Tough comparison for GM vs record
1H21 results.
Generally lower contribution from
Market Making, partly due to lower
level of activity by institutional

Investors

A more challenging environment in 1H22 both at macro and market level

Strong outperformance of Investment Banking, thanks to M&A and Advisory, despite unsupportive market for IPOs/ECM
